Professional Summary

Full Stack Developer specializing in the MERN stack (MongoDB, Express.js, React.js, Node.js) with experience in API development, authentication, and performance optimization. Built MediCare, a healthcare platform selected for the National Level Hackathon by MSME, demonstrating innovation and problem-solving skills. Active open-source contributor, familiar with SQL, version control using Git/GitHub, and deploying applications on cloud platforms like Vercel and Render. Currently pursuing B.Tech (2022–2026) with a CGPA of 8.6.

Education

SASI Institute of Technology and Engineering

Bachelor of Technology in Computer Science and Engineering

- CGPA: 8.5 / 10

Tadepalligudem, India

Aug 2022 – Expected Jun 2026

Narayana Junior College

Intermediate (Mathematics, Physics, Chemistry)

- Percentage: 81%

Kakinada, India

2020 – 2022

Technical Skills

Languages	JavaScript, Python, C, Java, SQL
Frontend	React.js, EJS, Pug, Bootstrap, HTML5, CSS3, Tailwind CSS
Backend	Node.js, Express.js, REST APIs, MVC Architecture
Databases	MongoDB, MySQL, Firebase
DevOps & Tools	Docker, Jenkins, Kubernetes, Selenium, Git, GitHub, Postman, Vercel, Render
Authentication & Security	JWT, bcrypt, CSRF Protection, express-session
Cloud / Hosting	Vercel, Render, Firebase Hosting
Other Skills	Agile Methodology, CI/CD Pipelines, Real-time Chat & Video (Stream API)

Professional Experience

Backend Development Intern, Vyntyra Consultancy Services (Remote)

Sept 2025 – Present

- Design, develop, and maintain backend architecture using Node.js and SQL/NoSQL databases to support scalable web applications.
- Build and optimize RESTful APIs ensuring seamless communication between client and server systems.
- Implement efficient server-side logic and query optimization to enhance performance and reliability.
- Collaborate with frontend teams to integrate user-facing components with backend logic for cohesive functionality.
- Debug and resolve performance bottlenecks and bugs, improving system stability and uptime.
- Explore emerging backend frameworks and deploy cloud-based services to enhance scalability and modernization.

Web Development Intern, Aadi Foundation (Remote)

Jan 2025 – Mar 2025

- Developed and optimized RESTful APIs serving 1K+ concurrent users, improving latency by 30%.
- Refactored backend architecture with modular middleware and async handlers, boosting efficiency by 25%.
- Implemented secure authentication and session management systems to safeguard sensitive user data.
- Automated API testing and CI/CD pipelines with Postman and GitHub Actions, minimizing regression issues.
- Collaborated with stakeholders to define API contracts and maintain version-controlled production releases.

Projects

Medicare - The Health Care Platform | *MERN Stack, TypeScript Stream API, REST, AWS, JWT, RBAC*

- Selected for **MSME National Hackathon 3.0** and awarded a **Rs.7 Lakh grant** to develop this government-backed healthcare platform prototype.
- Developing a secure, role-based telemedicine app offering real-time chat, video consultations, appointment scheduling, blood bank locator, and health care Blogs.
- Integrated **Stream Chat and Stream Video APIs** to enable HIPAA-compliant doctor-patient communication with encrypted session handling.
- Executed **Role-Based Access Control (RBAC)** for Admin, Doctor, and Patient accounts to enforce data privacy and authorization logic.
- Architected scalable backend using modular Express middleware and asynchronous workflows, ensuring high system responsiveness under load.

BlogNest - Write, Share, Inspire | *MERN Stack, JWT, SendGrid, MVC Architecture*

- Developed a blog platform with full CRUD functionality, rich text editing, and admin moderation dashboard.
- Designed and implemented secure password recovery using SendGrid, token expiration, and encrypted routes.
- Adopted MVC architecture to ensure maintainable, testable code with clear separation of concerns.

Book Store Management System | *Node.js, Express.js, MongoDB, EJS, CSRF Protection, Nodemailer*

- Built a secure and scalable e-commerce platform for managing books, users, and orders with user authentication and session control.
- Added pagination and dynamic search/filter functionality using MongoDB queries to support efficient browsing across large datasets.
- Incorporated CSRF protection and server-side input validation to mitigate common security threats and protect user data integrity.
- Integrated email notifications using Nodemailer for password recovery and transactional alerts (e.g., order confirmation).
- Designed MongoDB schema to support order tracking, user roles, and inventory management with future scope for admin dashboard and analytics.

Certifications

NodeJS - The Complete Guide (MVC, REST APIs, GraphQL, Deno) – Udemy

Software Engineer Certificate – HackerRank

Problem Solving Certificate – HackerRank

Technology Virtual Experience Program – Deloitte Australia (Forage)

Full Stack Developer Certification – Oneroadmap

Achievements & Recognitions

Selected for **MSME Nationwide Hackathon 3.0** and awarded a **Rs.7 Lakh grant** for proposing an innovative technology solution addressing real-world healthcare challenges. Led efforts to design and develop a scalable prototype application.
